OUR HISTORY

INVEST IN THE CUSTOMER

SALES

Farmers are traditional in nature and often resistant to change. And there can be no greater change from traditional methods of application (i.e. tractors, aircraft and knapsacks) to drones.

We learned early on that these products cannot be effectively sold in a store or via a website. Our sales methodology therefore is to impressively demonstrate the technology in real spraying scenarios on farms by highly experienced and qualified sales staff, who can educate and engage technically with farmers.

TRAINING

PACSys provides free comprehensive training for every customer, optimising spraying results and ROI while reducing support burdens.

Our training incorporates seven years of experience in highly technical sugarcane conditions, making PACSys-trained pilots the best in the market. Quality training ensures quality spraying, results, reputation, and ultimately, increased sales.

SERVICE

OUR **COMMITMENT** TO YOUR *FARM'S SUCCESS*

We prioritise fast and effective customer service to minimise downtime and maximise your crops's potential

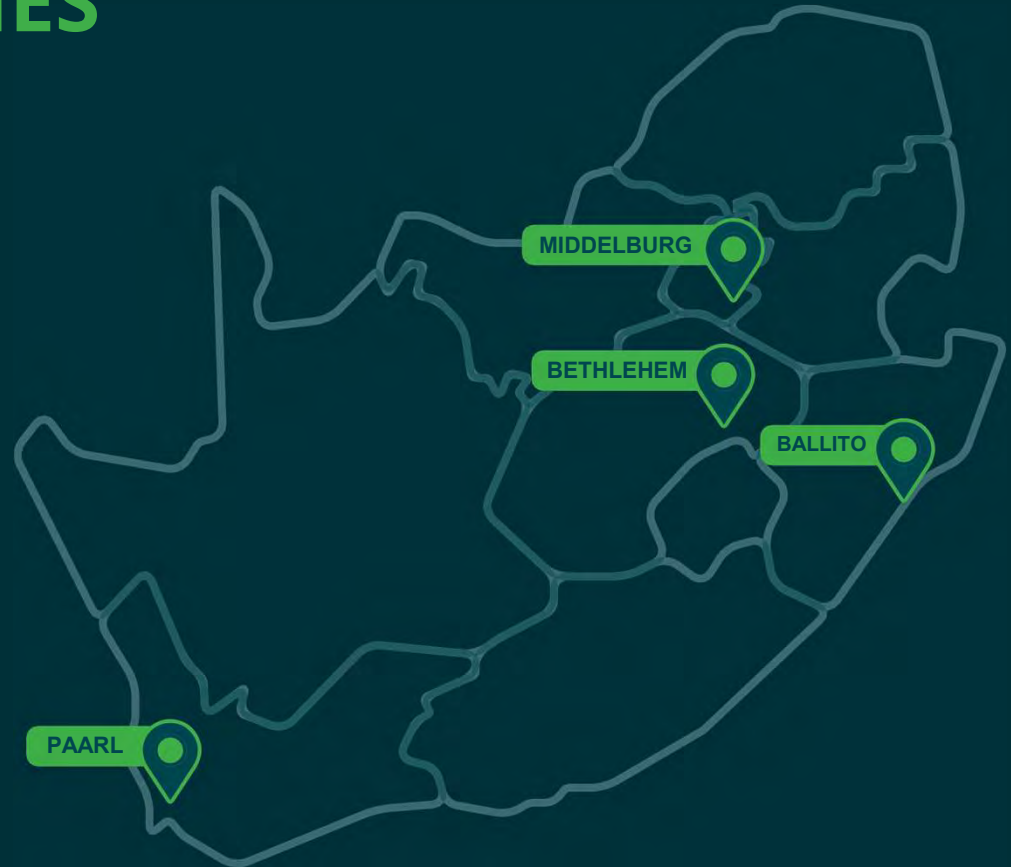

VISIT OUR BRANCHES NATIONWIDE

PACSys is the largest agricultural drone company in Africa, with approximately 30 staff members across various departments including admin, sales, training, customer service, and R&D.

We operate four branches in South Africa:

- 01** BALLITO - KZN (HQ)
- 02** BETHLEHEM - FS
- 03** MIDDELBURG - MPU
- 04** PAARL - WC

DRONE BENEFITS

PRECISE & CONSISTENT COVERAGE =
INCREASED PRODUCTIVITY

AIRCRAFT

AIRCRAFT

AIRCRAFT

DJI AGRAS DRONE
